About Me

I am a well-organized, fast-learning, and hard-working person. My research interests are laid on UAVs, Exploration, Path planning, Control, Visual SLAM, and Quadraped Robots.

I recommend to look over my 📄 Github and 📺 Youtube

Education

KAIST (Korea Advanced Institute of Science and Technology)

PH. D. **CANDIDATE** IN ELECTRICAL ENGINEERING, URBAN ROBOTICS LAB

Daejeon, Rep. of Korea

*Mar. 2021 - **Current***

KAIST (Korea Advanced Institute of Science and Technology)

MASTER IN ELECTRICAL ENGINEERING, URBAN ROBOTICS LAB

Daejeon, Rep. of Korea

Mar. 2019 - Feb. 2021

- GPA: 3.63/4.3

KyungPook National University

BACHELOR IN SCHOOL OF ELECTRONICS ENGINEERING

Daegu, Rep. of Korea

Mar. 2012 - Feb. 2019

- Graduation with top honors, **GPA: 4.23/4.3, rank: 2/354**
- Two-year leave for military service
- One-year leave for Working Holiday in Canada

Skills

Tools MATLAB, Solidworks, Blender, Sketchup, Gazebo

Programming ROS, C/C++, Python, MATLAB, Markdown, LaTeX, HTML

Languages Korean, English

Honors & Awards

2022. 10 **Only one team that finished the course:** Autonomous Flight Competition in Battlefield Situations

Rep. of Korea

2019. 12 **3rd Prize/424:** AIRR AlphaPilot (LockheedMartin & The Drone Racing League)

U.S.A

2019. 02 **Grand Prize:** The right person of University (SmartKey-KyungPook National University)

Rep. of Korea

2019. 02 **2nd Prize/354:** Best Graduates of The Year (KyungPook National University)

Rep. of Korea

2018. 11 **MathWorks Korea Special Prize:** R-BIZ Challenge Turtlebot3 Autorace (ROBOTIS & MathWorks Korea)

Rep. of Korea

Experiences & Projects

Autonomous Flight Competition in Battlefield Situations

Rep. of Korea

HOSTED BY ADD

May. 2022 - Oct. 2022

CONDUCTED AT URBAN ROBOTICS LAB IN KAIST

- The competition aims to develop an autonomous drone to pass through complex and dangerous outdoor obstacles, infiltrate an unknown two-story building, detect hidden targets, create precise 3D maps including target types and coordinates, and return to the starting point safely.
- I developed main framework including local/global path planners, 3D map logger with the detected target positions and a decision-making system.
- Relative video - video

KHNP Virtual Robot Challenge 2022 (as a maintainer)

[Rep. of Korea](#)

HOSTED BY KHNP

Sep. 2022 - Dec. 2022

- The goals of the competition was to develop a autonomous navigation algorithm and a robust controller to complete diverse and challenging tasks including obstacle avoidance, exploration, and enduring the wind disturbances.
- I made Gazebo maps for the competition and coded scoring GUI. Additionally, I coded sample controllers for the the quadrotor UAV.
- Relative video - video

Palm Tree Field Exploration and Tree Identification with UAV / UGV

[Rep. of Korea](#)

CONDUCTED AT AKA-AI ROBOTICS

Nov. 2021 - May. 2022

- The final goal of this research project is to develop an exploration system for monitoring unknown palm tree orchard environments while avoiding collisions and figuring out appearances of trees.
- I developed the whole system including pointcloud data processing, path planning, and controller. A state-of-the-art open-sourced SLAM algorithm is utilized.
- Relative videos - video1, video2

IEEE UAV Competition

[U.S.A](#)

HOSTED BY LPCV

Jan. 2022 - Feb. 2022

CONDUCTED AT URBAN ROBOTICS LAB IN KAIST

- The goals of the competition was to track the non-uniform motion vehicle at constant distance away with a quadrotor UAV, while avoiding obstacles.
- We estimated the trajectory of the moving vehicle in the form of 5th order polynomial using the detected center point with YOLO network. Then, Adaptive weight Model Predictive Controller (AMPC) is designed to track the target effectively.
- I mainly developed state estimator and MPC controller.
- Relative video - video

KHNP Virtual Robot Challenge 2021 (as a maintainer)

[Rep. of Korea](#)

HOSTED BY KHNP

Sep. 2021 - Dec. 2021

- The goals of the competition was to develop a autonomous navigation algorithm and a robust controller to complete diverse and challenging tasks including obstacle avoidance, manipulation for grasping a cube, climbing stairs, and enduring the disturbances.
- I made Gazebo maps for the competition and coded scoring GUI. Additionally, I coded sample controllers for the manipulator and the quadruped robot.
- Relative video - video

Unmanned Swarm CPS Research Lab

[Rep. of Korea](#)

SUPPORTED BY ADD

Jan. 2021 - Dec. 2021

CONDUCTED AT URBAN ROBOTICS LAB IN KAIST

- In this project, we developed adaptive multi robot localization method. With the high fidelity networking, artificial intelligent cooperative control, and mobile ground control station, unmanned swarm system has been researched to operate cyber-physical systems.
- As my lab was in charge of managing all 10 labs and developing multi robot localization, I mainly managed all members in the project, validated whole system for the demonstration, and developed localization algorithm.
- Relative video - video
- Relative paper - DOI: 10.23919/ICCAS52745.2021.9649888

Autonomous Drone Navigation for Power Line Inspection in Underground

[Rep. of Korea](#)

SUPPORTED BY KEPSCO AND KEPRI

Aug. 2020 - Dec. 2022

CONDUCTED AT URBAN ROBOTICS LAB IN KAIST

- In this project, we developed indoor SLAM, navigation, and exploration method to operate an UAV exploring the underground power line tunnel safely.
- In consideration with the limited payload and computational resource of the UAV, the precomputed and lightweight local exploration planner was developed.
- I mainly developed path planner and navigation system.
- Relative videos - video1, video2, video3
- Relative publications - DOI: 10.1007/978-981-16-4803-8_16, DOI: 10.1109/IROS51168.2021.9636611

A Study on the Visual-Inertial Navigation System of Artificial Intelligent Unmanned Aerial Vehicle for Reconnaissance and Exploration

[Rep. of Korea](#)

HOSTED BY ROND

May. 2020 - Nov. 2020

CONDUCTED AT URBAN ROBOTICS LAB IN KAIST

- The main goal of this project is to develop an UAV system with Visual-Inertial Navigation System for 3D mapping of unknown environments adopting single RGB-D camera.
- I mainly implemented whole system including VIO, YOLO object detection, mapping system, and controller.
- Relative video - video

AIRR AlphaPilot (Artificial Intelligence Robotic Racing)

U.S.A

HOSTED BY LOCKHEED MARTIN AND THE DRONE RACING LEAGUE

Mar. 2019 - Dec. 2019

CONDUCTED AT UNMANNED SYSTEMS RESEARCH GROUP IN KAIST

- AlphaPilot is the first large-scale open innovation challenge of its kind focused on advancing artificial intelligence (AI) and autonomy. The main goal of this competition is to finish the drone racing track as soon as possible autonomously.
- I mainly implemented a VIO (Visual-Inertial Odometry) and Kalman filter-based state estimator and basic controller.
- Our team won the 3rd prize among 424 teams over 81 countries.
- Relative videos - Youtube playlist

R-BIZ Challenge Turtlebot3 Autorace

Rep. of Korea

HOSTED BY ROBOTIS, MATHWORKS KOREA, KIRIA, AND MOTIE

Jun. 2018 - Nov. 2018

CONDUCTED AT PHYSICAL INTELLIGENCE LAB IN KYUNGPOOK NATL. UNIV.

- ROS based autonomous driving system for a mobile robot (Turtlebot3) is developed for completing the racing track with diverse missions.
- I mainly developed Lyapunov functional to control the robot, HOG-based object detector, and decision-making mission planner.
- Our team won the MathWorks Korea Special Prize.

Research on Multi-Rate Sensor Fusion based Mobile Robot Model Predictive Control System

Rep. of Korea

SUPPORTED BY THE ELECTRONICS AND TELECOMMUNICATIONS RESEARCH INSTITUTE (ETRI)

Apr. 2018 - Dec. 2018

CONDUCTED AT PHYSICAL INTELLIGENCE LAB IN KYUNGPOOK NATL. UNIV.

- The final goal of this research project is to design multi-rate State Estimator that can assume exact state using asynchronized data from a vehicle's multi sensor system.
- I mainly developed ROS based data processing system, LiDAR based path planning for the mobile robot.
- Relative publication - DOI: 10.1109/ICCE.2019.8661985

Military service

Rep. of Korea

REPUBLIC OF KOREA ARMY

Mar. 2013 - Dec. 2014

- Served as a Signaller in Combat Support Company
- Discharged as Sergeant

Activities

- 2022 UVS Symposium:** Invited talk - "How we won Autonomous Flight Competition in Battlefield Situations", 2022. 12., [Daejeon, Rep. of Korea](#)
- 2022 UVS Symposium:** Invited talk - "How we won Autonomous Flight Competition in Battlefield Situations", 2022. 12., [Daejeon, Rep. of Korea](#)
